

DuPont India Innovation Center

Background

- DuPont opened its India Innovation Center at Pune in August 2011.
- It is spread across 12,500 square feet in area and is located in Koregaon Park in the city
- Part of the global collaboration effort, this center creates opportunity and space to display industry specific innovations, latest technology offerings and industry trends to stimulate customer dialogue.

Objectives

- Work closely with both automotive companies and component & system manufacturers to develop automotive products and solutions through collaboration and partnership.
- Facilitate an exchange of ideas through real-time video technology with our global science network and create an inclusive atmosphere that will lead to innovative solutions meeting local needs.

Key focus areas

- Collaborate with local partners to develop products and solutions in areas of key challenges for the automotive industry, including:
 - Sustainability
 - Lightweight
 - Improved performance
 - Alternative drive
 - Safety, comfort and design

Leadership

- Yasuhiko Ohashi is the General Manager for the DuPont India Innovation Center. In his DuPont career of 32 years, Yasu has held various positions in marketing, sales, technical and systems development positions across a wide range of DuPont businesses.
