

The background of the entire image is a photograph of a modern interior space. A large, curved wall is the central focus, featuring a decorative pattern of white and yellow flowers and leaves. The wall is illuminated from below, creating a warm, golden glow. In the background, several people are standing near a counter or display area, and the overall atmosphere is sophisticated and contemporary.

Contemporary Feature Wall Design

with Versatile Corian® Surface

DuPont™ Corian® solid surface was the perfect solution for designers when they were looking for surface material to create a contemporary feature wall to display items in the main lobby of Big Cinemas.

Issue

Big Cinemas, having recently opened multiplex in Delhi, commissioned Adlabs In-House Architects, Mumbai to create a feature wall in a high-traffic zone in the lobby.

Solution

DuPont™ Corian® had all the attributes needed to create a truly contemporary, intricately designed feature wall. Corian® surface was engraved in 4 parts on a regular 8' x 4' CNC Bed. Panels were later seamlessly joined and finished into a beautiful perfectly aligned elegant display wall. The translucency of Corian® was ideal for backlighting the wall in the lobby.

Challenge

Designers were confronted with the task of finding a durable, elegant and versatile solid surface for the contemporary feature wall in the main lobby. The wall required a lightweight material that could hang by regular installation methods, as well as could be backlit.

Benefit

Corian® solid surface is an obvious choice for most architects as it is extremely versatile and can be easily thermoformed, backlit, engraved or seamed to meet the requirements of designs. Intricate designs could be directly engraved on the solid surface to exact specifications using CNC machinery. Beautiful and elegant Corian® gives designers a complete freedom to follow their imagination. Also it adds value to the architects vision because of its durability and low maintenance.
