

**With Tyvek® , we are rest assured that the coveralls are lint-free and meet the high standards required of the F&B industry**

**“I recommend DuPont™ Tyvek® because it is a reliable and trusted product.”**

**Amit Saini**, Hindustan Coca-Cola Beverages Pvt Ltd, Bengaluru, India.

### Synopsis

- As a Procurement Manager, I have the best interest of the organization and the employees while getting safety gear like PPE.
- Tyvek® 400 delivers reliable protection when working with chemicals, consumables, oil and gas applications, general maintenance/operations, fabrication, grinding, and general clean-up.

### Challenges

As a global FMCG company, we are committed to maintaining the highest comfort and safety standards, and we follow high-on-site worker protection policies. During general maintenance/operations, fabrication, and general clean-up, our workforce is exposed to many hazards as they work with chemicals, consumables, and oil and gas applications. As the Procurement Officer, I evaluated several options and found DuPont™ Tyvek® 400 to provide the most reliable protection and comfort.

### Solutions

Our frontline workers need complete body protection, and I strongly recommend Tyvek® 400 as it is lightweight, chemical-resistant, tear-resistant, and highly durable. Its enhanced focus on user comfort makes them easy to wear and remove. Especially during the summer season, we have found it extremely comfortable as the temperatures in India soar.

We also have been regular buyers of Tyvek® 400 as it has gained trust among the workforce who have experienced reliable first-hand protection. In our unit, Tyvek® 400 has saved many workers from injuries and fatalities. And of course, if we are safe, our families will be happy too!

I highly recommend Tyvek® 400 to others because it has multiple next-generation protection qualities. I think it is our social responsibility to promote high-quality products in our circle of peers so they can also benefit from trusted and reliable products like Tyvek® 400.
