

DuPont™ Kevlar® Gloves offer good protection in critical situations like fires and thermal shocks.

“It feels safer and more confident using DuPont PPE products.”

Shivam Mishra, In charge of the Material testing Department of a Government Defense vehicle manufacturing organization

Synopsis

- I have been working in the Material Testing department of a Government defense vehicle manufacturing organization for the last 7 years.
- We undertake heat treatment processes, Gear manufacturing, Quality Control, and Assurance.
- DuPont™ Kevlar® Gloves 450 PU protects us from fire hazards at work since they are protective with long sleeves.

Challenges

As a part of the Material Testing department, we perform critical tasks like heat treatment and gear manufacturing daily. Therefore, we need

protective gear that employs the best-in-class technology to keep us safe.

Solutions

We use DuPont™ Kevlar® Gloves 450 PU with long sleeves for protection at our material testing units. Kevlar® gloves are of excellent quality and reliable. The quality of DuPont™ Kevlar® Gloves is tremendous and offers good protection for a long time from fire and thermal hazards.

I have been using DuPont products for the last five years and have never had any complaints. I have witnessed the top-class protection that DuPont™ Kevlar® Gloves 450 PU offers and have seen many accidents averted solely due to our DuPont gloves. Not only I, but all my peers would recommend DuPont™ Kevlar® Gloves 450 PU to anyone working in a critical work environment such as ours.
